

NOC Engineer Level II

Position: NOC Engineer Level II

Type: Permanent Full-time

Salary/Pay: Commensurate with experience

General Summary:

The NOC Engineer Level II is responsible for managing and maintaining our end client's networks. Ensuring client satisfaction and quieting their networks are essential in this position.

Essential Duties and Responsibilities:

The NOC Engineer Level II position is a key contributor in the success of managing our client's networks. This is achieved by quickly resolving incidents that our clients open tickets for and by constantly monitoring the alerts generated by our tools to resolve incidents before our clients are aware.

Knowledge, Skills, and/or Abilities Required:

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skill, and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

- Ability to work on multiple priorities and/or projects simultaneously.
- Excellent listening and communications skills, both verbal and written.
- Strong customer relationship skills.
- Organized, detail oriented and self-motivated.
- Ability to provide and maintain detailed documentation on each ticket.
- Strong computer skills and the ability to effectively communicate through e-mail.
- Intermediate knowledge in routers, layer 2/3 switches, and other networking devices.
- General knowledge in managing Microsoft Server Operating Systems and Networks.
- Advanced knowledge of all Microsoft Workstation Operating Systems and Applications.
- Ability to remain in contact with the client thru the completion of tickets.
- Problem-solving abilities and ability to meet reasonable deadlines.
- Ability to build positive and collaborative relationships.
- Willingness to develop professionally.
- Ability to work with little supervision and manage a team.

Expected Outcomes:

- Success in the NOC Engineer II position will be based on your ability to meet or exceed our client's expectations and by exceeding the SLA (Service Level Agreements) put in place for the various agreements.
- NOC Engineers will be graded on the profitability of the client agreements and on the quantity of closed tickets, speed of ticket closure and first-time ticket resolution.

Educational/Vocational/Previous Experience Recommendations:

- A+ Certification is preferred.
- NET+ Certification is preferred.
- Microsoft Certified Professional (MCP) is preferred.
- 3+ years' experience in computer network management is required
- Experience in managing end client networks is preferred.

Working Conditions:

- Normal professional, office environment.

The statements above are intended to describe the general nature and level of work being performed by people assigned to this job. Other duties may be assigned as needed.
